

Create your own water cycle collage

Materials

- Paper plate
- Thick texta or pen
- Collage materials
 - i.e. tissue paper, cellophane, magazine pictures, cotton wool
- Sticky tape or glue
- Colouring in pencils

Method

1. Divide the plate into four equal sections
2. Label each section with a stage of the water cycle
 - Evaporation
 - Condensation
 - Precipitation
 - Collection
3. Create a diagram using collage, illustrations or words to describe each stage of the water cycle
4. Use arrows to show how water travels through each stage
5. Roll the plate to show that the water cycle goes around and around.

Figure 1: Collage materials

Figure 2: Completed collage

Did you know that the water cycle goes round and round?

This is called **continuous**
