

21 April 2009

In accordance with principle 4.2 of the Ministerial Notice dated 5 May 2008 issued under section 36 of the *Electricity Supply Industry Act 1995*, Hydro Tasmania must provide a semi-annual public report on inter-regional trading.

Physical Summary

GWh's Imported	1513
GWh's Exported	35
% of time under import	93.5
% of time under export	5.7

*- Values for the period 1 October 2008 – 31 March 2009.

The heavy import regime employed over Basslink during the period is evident in the above numbers. The majority of exports occurred during both high inflow periods to reduce the volume of water lost due to spill over our run-of river storages and high price periods in Victoria.

Contract Summary

Prices in swaps and caps were made to authorised counterparties during the period with some transactions resulting. There were no inter-regional products which traded. Tasmanian contract prices have been shown on broker screens since 31 March 2009.
