

Image created: 23/05/2025 @ 03:15 Time is Eastern Standard Time (EST), represented by vertical dotted line (add 1hr during daylight savings).  
Hydro Tasmania supports recreational angling access to the Julian-Pillans fishery by aiming to maintain Augusta water levels below 2.62m below full supply (1148m above sea level) between December to February inclusive. Where possible, water levels will be maintained above 3.99m below full supply (1146.63m above sea level) to support recreational angling and fisheries operations in Liawenee canal. Details of minimum levels can be found in our MoU with IFS, <https://www.hydro.com.au/things-to-do/fishing>

Height above Sea Level	Metres
Full Storage Level	1150.62
Last Level Reading	1148.40
Normal Minimum Operating Level	1141.63
